

Spring Light

by GLANCEY, JONATHAN

Spring Light

This accessible and comprehensive book shines a light on the design history of the famous Anglepoise lamp. Starting with the beginnings of the company with George Carwardine, the designer behind the lamp, the book takes you through an illuminating journey of the development and influence of this British icon. In 1932, vehicle suspension engineer George Carwardine designed the spring, crank and lever mechanism that became the blueprint for the first Anglepoise lamp. Enchanting the world with its light-to-the-touch and anthropomorphic design, the unique and characterful form has adorned the worktables of everyone, from writers to engineers, from the Second World War through to the 21st century. Cozy as it is utilitarian, the intimately focused pool of light the Anglepoise creates around an individual's work is as poetic as it is practical. Today, the lamp is a sure sign of quality and has been hailed as a hallmark of British design.
